ORGANIZE GROUP TO BOOST NEW HIGH SCHOOL BAND

A group has been organized to "boost" the new, combined St. Stanislaus-St. Joseph High School Band. At a meeting recently held, Mr. Pat Murphy was chosen President; Mrs. H. Neale was elected Vice-President; Mrs. Edith Carver was selected for the Corresponding Secretary post; Mrs. Marie Johnson is the Recording Secretary; and Mr. Chas. Poolson will be the Treasurer.

Mr. Clem Toca, Band Director, announced plans for the current year. These included community-civic events, such as the Veterans Day Parade held last Thursday, the Pearl River-Southwest Football Game here at Tiger Stadium on November 20th, appearance at the St. Stanislaus football games, musical programs; and competitive events such as an appearance in New Orleans at Carnival, state competition in Jackson, and national competition at Enid, Oklahoma.

One of the purposes of the booster group is to raise funds to defray part of the expense of the bands activities. It was decided that a light bulb sale would be used as its first project. During December, General Electric bulbs will be made available to the coast residents from Lakeshore to Gulfport; and also to the friends and families of the boarders in New Orleans. Most types of household bulbs will be readily available. Others, either household or fluorescent, can be obtained with very little delay. Christmas tree lights, either singly or in strings, will also be available. Club officials urge everyone to participate in the bulb sale by replacing burned out bulbs, and by also getting a few extras from the band booster representative when he calls.

WATER PROBLEMS IN BAY ST. LOUIS

Due to installation of the new sewage and water systems in Bay St. Louis, many of the old water mains are inadvertently being broken. This causes concern to both city and public health officials, according to Wayne Allison, Sanitarian with the Hancock County Health Department.

Residents may be assured that all precautions are being taken by city officials, contractors, and public health personnel to avoid getting contaminated water in the lines. At each break in the lines, chlorine tablets are being added for sterilization purposes. This poses no hazard to the public, although if close enough to the break you may be able to taste and smell the chlorine. This chlorine may also cut a small amount of algae and iron from the water, causing the water to appear trashy. This will cause no harm, according to Mr. Allison. Mr. Allison also states that the chlorine will give a slight creosote taste.

Water samples are being collected regularly and analyzed by the Public Health Laboratory.

BAY HIGH SCHOOL CONDUCTS HEARING TESTING

Volunteer parents from Bay High Parent-Teachers Association last week conducted tests to determine which high school students have hearing difficulties serious enough to interfere with normal classroom learning.

Using an audiometer provided by the Mississippi State Department of Health, the PTA volunteers checked the hearing of 558 students and found 112, or 20%, to have sufficient difficulty in enough of the sound frequency tested to warrant their being rechecked in about 10 days. This number is expected to be reduced at that time, since some of the students had colds at the time of testing.

Parents and teachers of those students still showing hearing defects on the second test will be notified, since, in the majority of cases, the student is unaware of his own problem.

At the regular PTA meeting Tuesday night in the school auditorium, Dr. Walter Russo spoke on vision problems and the necessity of discovering eye defects as soon as possible.

In January the PTA plans to conduct another testing program to screen high school students to discover those with vision problems.

It was announced Bay High has a PTA membership this year of 306, the largest on record.

Following the business session refreshments were served by Mrs. Robert Schilling and Mrs. Paul White, assisted by mothers of the senior class.

PHONE CUSTOMERS TO BENEFIT FROM EXCISE TAX REDUCTION

Telephone customers in Bay St. Louis will get the full benefit when the federal excise tax on telephone service is reduced on January 1, 1966, from \$2.18 to \$1.72 on the average, in Federal Tax on telephone service.

Presley explained that a number of excise taxes have been or will be removed under the Excise Tax Revision Law passed this summer, and the tax on local and long distance telephone service is one of the major ones.

The excise tax on telephone service will be reduced from 10 percent to three percent on January 1. The remaining three percent will be reduced to one percent a year until the whole tax is eliminated on January 1, 1969.

Presley explained that the excise tax is a tax on telephone customers, not on the telephone company. The company has merely collected the tax and passed it on to the U. S. Government.

If your basic telephone bill in a month is \$12.00, including long distance calls, then you have been paying another \$1.20 for federal excise tax. Starting January 1, you would pay the \$12.00 plus only 36 cents tax and three years from now, you will pay no tax.

BIG BOOK

The atlas is quite an armful. Chip had a time
lugging it down off the shelf, but he wanted, once
again, to look at some of the fascinating pictures.

He's a small boy for such a big book. Maybe he
doesn't understand all of it. But it whets his curi-
osity, and the curiosity of a small boy is truly
insatiable.

Even as Chip glances at the pictures, questions
are racing through his mind. And to whom will he
address these questions? To you!

When youngsters ask questions, it is up to us,
supposedly "grownup" and therefore wiser, to try
to give them the right answers. In this day of some-
times dubious and changing values, that isn't always
easy. We must first make sure that we have the
true basic answers ourselves. There is no surer
way of doing this than by arming ourselves with
the faith and wisdom found in the Holy Scriptures
and in our churches.

CHANCERY SUMMONS
No. 9785
THE STATE OF MISSISSIPPI,
To Savannah A. Reason, if alive and if dead, her unknown heirs at law or legatees, and any and all persons having or claiming any right, title or interest in and to the following described property, to-wit:

Jan. 12, St. Stanislaus, away; Jan. 17, Bay High, away; Jan. 18-22, Bay High Invitational Tournament; Jan. 20-22, Gulf Coast Conference Tournament at Pearl River Central.

The examiners began operations this week in Hinds, Jefferson, DeSoto, Holmes, Neshoba and Walthall counties and were already under way in eight.

The commission said on Monday the federal examiners registered 25 persons in Hinds, including 10 in Jackson and 15 in Raymond, and 12 in Benton, 7 in Clay, 79 in Coahoma, 41 in DeSoto, 37 in Holmes, 7 in Humphreys, 52 in Jefferson 21 in Neshoba and 48 in Walthall.

Five were rejected for not meeting requirements.

The state has won state court orders in Jones, Leflore, Madison and Jeff Davis counties blocking the county registrars from adding federally-registered persons to county voting lists.

Since then, the offices of federal examiners in these counties are open only on the third Saturday of each month.

**STATE'S LOSS BY
MIGRATION STUDY**
STATE COLLEGE, Miss: People appear to be one of Mississippi's principal exports, according to a recently published analysis of census figures.

Census takers in 1960 found 1,227,371 Mississippi-born people living in other states, compared to 286,875 natives of other states residing in Mississippi. This represented a net migration loss of 940,496 persons.

Sociologists George L. Wilber and Tommy W. Rogers, of the Mississippi Agricultural Experiment Station, explored the history of interstate migration in a recent study. They found the state's migration loss had been increasing steadily with every census since 1890. A high birth rate has offset it, so that it is not apparent in the state's total population figures.

Four out of every ten Mississippi-born persons counted in the 1960 census were found living in other states. Illinois had the greatest number, 216,056, followed by Tennessee 148,616, Louisiana 135,156, Texas 87,727 and California 86,714.

Alabama furnished the most immigrants to Mississippi, 55,333, and got 69,254 Mississippians in return. Following in order were 42,119 Louisiana-born people living in Mississippi and 28,646 from Tennessee.

The analysis showed a great difference in the racial composition of the migrants. For each white person moving to Mississippi 2.5 whites moved from the state. For

non-whites, however, the ratio was 1 to 16. Net losses for whites were 338,986; for non-whites 662,248.

The complete report of this study, showing movements to and from all the states, has been published in the November issue of Mississippi Farm Research. It may be obtained free on request from the Agricultural Experiment Station at State College, Mississippi.

MEETING OF SUPERVISORS PROCEEDINGS...

SCHOOL.
The Board took up for consideration the bids for \$350,000 of bonds and the following bids were submitted:

WILLIAMS AND COMPANY	3.8802
NATIONAL BANK OF MISSISSIPPI	3.8802

Speed and Company was considered for the reason that it failed to comply with the requirement in that the bid envelope containing the face of the bond and company failed to mark plainly on the face of the bond "Proposal for Bonds" as required by the advertisement and that reason same was rejected. As to the other bids submitted the Board considered all of said bids and same were rejected as being too high as to the average interest rate. Therefore all of the bids submitted were rejected and the Board invited bids and the Hancock Bank having submitted the following bid:

HANCOCK BANK	3.68215
--------------	---------

and same being at a lesser rate of interest than the legal bids submitted; the bid being in the following words and figures, to-wit:

Hancock County School District of Hancock County, Mississippi Gentlemen:

Average interest cost: 3.68215

Respectfully submitted:
HANCOCK BANK
BY: /s/ ROBERT HAMILTON

HANCOCK BANK

The motion for the acceptance of said bid made by Supervisor Lott duly seconded by Supervisor Dean absent from room.

NASA News..

NEW ORLEANS, La. — The National Aeronautics and Space Administration selected Telecommunications Services Inc., Panorama City, Calif., and Ling-Tempco, Inc., Dallas, Tex., for competitive negotiations of a contract to provide computer support service for the NASA-Michoud Assembly Facility in New Orleans.

FORESTRY NOTES

A claim sounded by the hardwood center in Memphis over the mass clearing of hardwood timberland is evident. You can hear increased demand for hardwood timber in the future. Our low areas and bottomland steams are ideally suited for the production of hardwood timber in South Mississippi.

We must take four main steps if we are to grow quality hardwood timber in South Mississippi:

- First, protect from fire and grazing. Hot fires kill or severely damage practically all hardwood saplings and poles and many saw timber trees. Even light fires can destroy seedlings and scar larger trees. Livestock grazing can seriously damage hardwood seedlings. Seedlings not completely killed by grazing are stunted and have poor form.

Second, release desirable seedlings and trees by removing or deadening culls. Your best hardwood species do not grow well under shade. In some cases you will have to release the more desirable species for them to become established.

Third, sell low quality trees first. Most hardwood timber has been high-graded in the past. The larger, high quality trees have been cut leaving the poorer quality small trees. Even the best of these, your goal should be to sell the undesirable or low quality trees and let the trees of better form and species continue to grow.

Four, see your local Forester. Mississippi Forestry Commission Foresters can help you with establishing a desirable hardwood stand. Your local Forester can:

- (1) advise you on fire prevention measures, (2) help you to decide which trees to remove or deaden, (3) show you the best method of deadening, (4) help you selectively mark your timber and (5) advise you on how to sell your timber.

Contact Forester Arthur Verdel of Hancock County at telephone number 467-4711 for advice or assistance with your timberland problems.

Sign Mutual Aid Pact For Mosquito Control

GAINESVILLE, Miss. — An agreement providing for mutual aid in combating mosquitoes and other insect pests was signed today by the Gulf Coast Mosquito Control Commission, representing Jackson, Harrison and Hancock Counties, and by the General Electric Co.'s Mississippi Test Support Department on behalf of the National Aeronautics and Space Administration's Mississippi Test Facility.

The ceremony which included welcomes by Woodside and by Jackson M. Balch, MTF site manager, illustrated presentations on mosquito control by GEMTSD entomologist Frederick W. Harden and GEMCC director C. M. "Chris" Elmore, Jr. and a tour of the test site for the guests.

The subcontract, confirming cooperative arrangements in effect for several months, provides for each agency to conduct surveys and operations toward control and elimination of mosquitoes in their respective areas, exchanging information to guide mutual efforts. It provides for General Electric to furnish a helicopter, chemicals, draglines, fogging and misting trucks and other equipment for use in Harrison and Hancock Counties, including the "buffer" zone of the NASA test site. The total work more attractive both to new comers and ourselves. He said that "by delineating responsibilities, by arranging for each agency to carry out those tasks for which it is best equipped, by pooling of expensive equipment and by close liaison, a mutual aid plan can cut costs to all concerned."

Elmore and Harden both emphasized that the most effective and economical method of mosquito control is on an area-wide cooperative basis. It must be recognized, they said, that the effort must be continuous and requires

expenditures of manpower and funds and use of appropriate equipment.
